

Annex I. Word Cards – an example

Create your word cards by identifying a main topic and a series of words belonging to that category. Here is an example of word cards related to the category "places in your house". You can do the same with any topic!

Topic: Places in Your house

Cut along the lines, in order to have one word per card. Distribute each of them to your students:

- They use non-verbal communication and act the word to make their peer guess it
- They will imagine to be in the room written in the card and create a logic dialogue between them
